## FOREWORD

This database is a comprehensive data collection material of EU companies, active in the fields of smart textiles and smart materials production. Companies are organized by Classification of technical textiles.

In this database, micro to large companies, startups and incubator projects are collected and presented.

By designing this database, we offer young people information regarding their fields of interest.

The database offers a well-organized, structured overview of EU textile companies active in the fields of smart textiles, smart technology and advanced textile materials as well EU based manufacturers of raw materials, components and services to support ideas in smart textile fields.

The companies in this database are organized based on their specific line of work due to the established Classification of technical textiles.

To clearly define the fields of work in which the company is active, pictograms were developed and are provided at the head of the table describing each company. To better understand the meaning of each pictogram, a list of definitions is provided at the beginning of this document.

Each table is equipped with relevant information about the company so the reader can grasp important information right away. Information such as where the company is located, its website, logo, brief description of company products and technology used are provided in each table.

To ease the search through the textile database, this booklet is provided with a table at the very beginning where all the company names and fields of work are provided with the page number so the reader can quickly browse through the booklet.

## Introduction

For easier navigation through the database, pictograms were created to ease and visualize fields of operations of each company presented in this document.

Table 1: Pictograms and their explanation

	<b>Knitting</b>		<b>Textile sensors</b>
	<b>Yarn production</b>		<b>Textile temperature sensors</b>
	<b>Smart Yarns</b>		<b>Medical Textiles</b>
	<b>Fabric Production</b>		<b>Textile design</b>
	<b>Non-wovens</b>		<b>Laminated materials</b>
	<b>Sewing</b>		<b>Workwear garments</b>
	<b>Pattern making</b>		<b>Outdoor textiles</b>
	<b>Weaving</b>		<b>Flame retardant</b>

## SPORTTECH

In this chapter, companies that classify and are active in the SPORTTECH fields are presented.

Each table is equipped with pictograms, depicting lines of work where companies are active in, the country where the company is located, a description of available products and technologies as well as a website and a brief company description.

Table 2: Company Born

		SPORTTECH	
COMPANY NAME		Born GmbH Germany	
    			
<b>COUNTRY</b>	Germany		
<b>PRODUCTS AVAILABLE</b>	Innovative technical textiles, tailor-made “wearables” with integrated sensors, electrodes or stimulators, intelligent yarns and high-end electronics, medical textiles, fashionable knitwear, design, development, and sales of trendsetting fashion collections.		
<b>TECHNOLOGY AVAILABLE</b>	Modern flat and circular knitting machines, modern HF welding and thermal printing machines, textiles for electrical muscle stimulation, intelligent yarns and high-end electronics		
<b>WEB PAGE</b>	<a href="https://born-germany.de/en/home/">https://born-germany.de/en/home/</a>		
<b>COMPANY DESCRIPTION</b>	Family-run, integrated textile company since it was founded in 1991. Using the most modern textile and knitting machines, they develop and produce trendsetting, innovative textile products. Focusing on medical textiles such as orthopaedic human and veterinary bandage systems. Born GmbH owns various patents in the smart textiles field and is constantly refining them in collaboration with customers, leading technical universities, and technical colleges.		

Table 3: Company Clim8

		<b>SPORTTECH</b>	
<b>COMPANY NAME</b>		Clim8	
			
<b>COUNTRY</b>		France	
			
<b>PRODUCTS AVAILABLE</b>		Motorcycle, outdoor, workwear gloves and mid-layer sweatshirts with integrated heating system, body temperature sensors, impact, and self-regulating heating systems.	
<b>TECHNOLOGY AVAILABLE</b>		Intelligent heating with artificial intelligence embedded in the core8 products. Automatic on-body detection system. Seamless heating elements, smart battery system with intelligent battery usage.	
<b>WEB PAGE</b>		<a href="https://myclim8.com/">https://myclim8.com/</a>	
<b>COMPANY DESCRIPTION</b>		A premium wearable technology and special ingredient brand with deep roots in science, data and textiles provides a personalized and automated thermo-regulation experience. A multi-disciplinary team of experts from a wide range of fields, including Doctors, Engineers, and Specialists in Thermophysiology and Human Comfort, IoT, Electronics, Textile Design and Manufacturing.

Page 7 of 28

Table 4: Company Schoeller

	<b>SPORTTECH</b>	
<b>COMPANY NAME</b>	Schoeller	
	   	
<b>COUNTRY</b>	Switzerland	
<b>PRODUCTS AVAILABLE</b>	Functional textiles (Outdoor, sports, Lifestyle, Cosmopolitan), Protective textiles (Motorcycle, Multinorm, Police and military, Circular Workwear), Knitted textiles (absorption, insulation, protection, protection plus), Technical Textiles	
<b>TECHNOLOGY AVAILABLE</b>	<p>Flame protection with the aid of pyroshell™ technology.          Wind and rain protection with c_change™ membrane, ideal moisture management with 3XDRY® technology, maximum abrasion resistance with cerspace™ technology. For special units, a suppressed thermal signature – integrated into the specific local camouflage print – with camoshield™ technology.          Etc.</p>	
<b>WEB PAGE</b>	<a href="https://www.schoeller-textiles.com/en/">https://www.schoeller-textiles.com/en/</a>	
<b>COMPANY DESCRIPTION</b>	The globally operating company specializes in the sustainable development and production of innovative textiles and textile technologies, which are leaders in niche markets worldwide.	

Deliverable n° - name

[www.hacktex.eu](http://www.hacktex.eu)

Page 8 of 28

Table 5: Company Prevent&Deloza

	<b>SPORTTECH</b>
<b>COMPANY NAME</b>	Prevent & Deloza
	
<b>COUNTRY</b>	Slovenia 
<b>PRODUCTS AVAILABLE</b>	<p>Tactical and hunting, flame retardant, medical clothes gear.</p> <p><b>FireCat</b> gear is a sensor-equipped suit for work in dangerous environments. It includes a built-in sensor, an alarm, a first aid plan and a black box. The sensors warn the user about the potential danger as well as inform the central base about the situation, thus ensuring safer conditions in the field.</p> <p><b>KINSHIRT</b> is a kinesiological assistant and a next-generation active, smart shirt, which enables the user to gain valuable insight into the most efficient way to perform individual exercises and reach optimal results, based on data, which is gathered by textile-integrated super-sensitive sensors.</p>
<b>TECHNOLOGY AVAILABLE</b>	Textile integrated sensors, send analysed data directly to the Mobile App via Bluetooth. Factors of breathing frequency, cadence, arms/legs acceleration, and the mobile app interpret the results in a precise visual graphic
<b>WEB PAGE</b>	<a href="https://www.prevent-delozza.si/sl/">https://www.prevent-delozza.si/sl/</a>
<b>COMPANY DESCRIPTION</b>	Leading the way in the most innovating protective garment out there. Products meet the standards, do their job flawlessly and look good doing it.

Deliverable n° - name

Page 9 of 28

## PROTECH

In this chapter, companies that classify and are active in the PROTECH fields are presented.

Each table is equipped with pictograms, depicting lines of work where companies are active, the country where the company is located, a description of available products and technologies as well as a website and a brief company description.

Table 6: Company GoodPro

	<b>PROTECH</b>	
<b>COMPANY NAME</b>	<b>GoodPRO</b>	
		
<b>COUNTRY</b>	<b>Czech Republic</b>	
<b>PRODUCTS AVAILABLE</b>	Non-flammable suits, gloves, underwear, curtains and covers. Aluminised suits, protective helmets, shields, and hoods.	
<b>TECHNOLOGY AVAILABLE</b>	Production and development of personal protective equipment against heat risks, smart garments for firefighters with new level of active protection. Integrated, sophisticated electronic systems. Smart garments with active protection, providing warnings about possible danger situation and communication with the commander of the intervention.	
<b>WEB PAGE</b>	<a href="https://www.prevent-deloza.si/sl/">https://www.prevent-deloza.si/sl/</a>	
<b>COMPANY DESCRIPTION</b>	Protection wear combines the latest technology with outstanding comfort.	

Table 7: Company Teijin

	<b>PROTECH</b>
<b>COMPANY NAME</b>	Teijin Aramid
	
<b>COUNTRY</b>	Netherlands
	 <i>Human Chemistry, Human Solutions</i>
<b>PRODUCTS AVAILABLE</b>	Ballistic vests, automotive breaks, civil engineering products, composites, conveyor belts, cur-protection products, elastomer reinforcements, engineering plastics, flexible flowlines and umbilicals, friction paper, heat and flame-resistant garments, helmets, kiteboarding, mooring lines, motorcycling, optical fibre cables, parachute cords, ropes and cables, sailing, sealing materials, thermoplastic pipes, tires, yachting.
<b>TECHNOLOGY AVAILABLE</b>	Twaron, Teijinconex, Endumax, Technora
<b>WEB PAGE</b>	<a href="https://www.teijinaramid.com/en/products/twaron/index.html">https://www.teijinaramid.com/en/products/twaron/index.html</a>
<b>COMPANY DESCRIPTION</b>	World's number one aramid producer with a near-50% market share. A company with customers in 74 countries, that has helped break records, send spacecraft to Mars, and drive progress in Formula One.

Table 8: Company Wearin

	<b>PROTECH</b>	
<b>COMPANY NAME</b>	<b>Wearin</b>	
		
<b>COUNTRY</b>	<b>Switzerland</b>	
<b>PRODUCTS AVAILABLE</b>	Modular, plug-and-play sensors in protective vests for connected miners, logistic workers, construction workers. Rugged, modular sensors adapted to each mission for defence personnel, Modular, integrated sensors for safer agents and officers, Modular, integrated sensors for safer first responders.	
<b>TECHNOLOGY AVAILABLE</b>	Real-time insights for improved mission outcomes, intelligent IoT platform that generates real-time insights by capturing in-mission data from connected sensors and devices. With automatic alerts and a digital platform to visualize key data, Wearin' helps detect and prevent health and safety risks, improve live coordination, and enable remote guidance.	
<b>WEB PAGE</b>	<a href="https://wearin.tech/">https://wearin.tech/</a>	
<b>COMPANY DESCRIPTION</b>	The company is a tech spin-off, connecting and protecting people in high-risk situations with intelligent IoT solutions that make missions safer and smarter.	

Table 9: Company WarmX

	<b>PROTECH</b>	
<b>COMPANY NAME</b>	<b>WarmX</b>	
		
<b>COUNTRY</b>	<b>Germany</b>	
<b>PRODUCTS AVAILABLE</b>	Heating underwear for leisure, motorcycling, riding, and hunting.	
<b>TECHNOLOGY AVAILABLE</b>	Product development, hard and software development especially adjusted to textile needs,	
<b>WEB PAGE</b>	<a href="https://www.warmx.de">https://www.warmx.de</a>	
<b>COMPANY DESCRIPTION</b>	Manufacturers of heated underwear gained a reputation amongst developers of smart textiles. The patented technology can be employed in a wide range of applications.	

Deliverable n<sup>o</sup> - name

Page 13 of 28

Table 10: Company Interactive Wear

	<p><b>PROTECH</b></p>	
<p><b>COMPANY NAME</b></p>	<p>Interactive Wear</p>	
		
<p><b>COUNTRY</b></p>	<p>Germany</p>	
<p><b>PRODUCTS AVAILABLE</b></p>	<p>conductive textiles to develop and produce lightweight, flexible but robust systems, collaborating with research institutes and specialists for embroidery, weaving and trims to provide components for apparel and interior designers.</p> <p>Electronics are integrated into flexible environments, especially garments and other textile products.</p> <p>Providing components and techniques to merge electronics with textiles, resulting in smart systems and products. Provide new concepts of multimodal user interaction, comprising textile products as smart interfaces, integrated electronics for data acquisition and control, application software for data analysis and mobile applications for complex user interaction</p>	
<p><b>TECHNOLOGY AVAILABLE</b></p>	<p>Product development, Consulting and engineering, components and systems,</p>	
<p><b>WEB PAGE</b></p>	<p><a href="http://www.interactive-wear.de/">http://www.interactive-wear.de/</a></p>	
<p><b>COMPANY DESCRIPTION</b></p>	<p>The company develops and produces electronic systems designed for textile integration and wearable systems enabling customers to digitize, interconnect and innovate their products. Company focus covers heating, light, sense and feedback solutions. Utilizing technologies such as flexible conductive textiles, connectivity components and modular electronics platforms. Distributed software architecture includes real-time embedded systems, application software and mobile applications.</p>	

Table 11: Company Albiro

	<b>PROTECH</b>	
<b>COMPANY NAME</b>	Albiro	
		
<b>COUNTRY</b>	Austria	
<b>PRODUCTS AVAILABLE</b>	ALBIRO sells individual solutions. This is because the clothing must "grow" with the requirements and, follow legal standards.	
<b>TECHNOLOGY AVAILABLE</b>		
<b>WEB PAGE</b>	<a href="https://www.albiro.at/service.html">https://www.albiro.at/service.html</a>	
<b>COMPANY DESCRIPTION</b>	ALBIRO WORKWEAR ensures that the employees of a company are well dressed, represent their company stylishly and feel comfortable in their work clothes. From farmer to craftsman. Corporate fashion must be individual, highly functional and technically mature as well as adapted to the company's standards.	

Table 12: Company Holik

Deliverable nº - name

[www.hacktex.eu](http://www.hacktex.eu)

Page 15 of 28

 <b>HACKTEX</b>	<b>PROTECH</b>	
<b>COMPANY NAME</b>	<b>Holik International</b>	
  		
<b>COUNTRY</b>	<b>Czech Republic</b>	
<b>PRODUCTS AVAILABLE</b>	Production and development of firefighting and rescue, defence gloves footwear and medical equipment.	
<b>TECHNOLOGY AVAILABLE</b>	Holik is using Poron XRD, D30 Impact protection material, Impacton-impact knuckle, Nomex, Kevlar, PBI, Porelle PU FR, Porelle PTFE, Ceramic, NANO, Explorer Sole, YUMA, TOPAZ micro materials. Regarding the technology, SensPro, RFID and NFC Chips are used	
<b>WEB PAGE</b>	<a href="https://en.holik-international.cz/">https://en.holik-international.cz/</a>	
<b>COMPANY DESCRIPTION</b>	Engaged in the production and development of gloves, footwear and medical devices. These fields are built on the combination of traditional and proven processes complemented by modern technologies.	

Table 13: Company Pykres

Deliverable nº - name

[www.hacktex.eu](http://www.hacktex.eu)

Page 16 of 28

	<b>PROTECH</b>	
<b>COMPANY NAME</b>	Pykrs	
		
<b>COUNTRY</b>	Spain	
<b>PRODUCTS AVAILABLE</b>	Smart jackets with integrated lights, monitors for fall detection, a Heating system and an SOS alert.	
<b>TECHNOLOGY AVAILABLE</b>	Pykrs jacket has integrated sensors for fall detection, GPS position and SOS alert system, has integrated light panels which make the user three times more visible, has a long-lasting battery and is waterproof. All the features of the jacket can be controlled via a smartphone application.	
<b>WEB PAGE</b>	<a href="https://en.holik-international.cz/">https://en.holik-international.cz/</a>	
<b>COMPANY DESCRIPTION</b>	Outdoor company focused on developing, manufacturing and marketing sustainable, functional and smart jackets with a technological base	

## MEDTECH

In this chapter, companies that classify and are active in the MEDTECH fields are presented.

Each table is equipped with pictograms, depicting lines of work where companies are active, the country where the company is located, a description of available products and technologies as well as a website and a brief company description.

Table 14: Company Bioservo

	<b>MEDTECH</b>	
<b>COMPANY NAME</b>	<b>Bioservo</b>	
		
<b>COUNTRY</b>	<b>Sweden</b>	
<b>PRODUCTS AVAILABLE</b>	Sensor and cutting-edge technology integrated in special gloves to offer muscle and strength support to people which muscular system is in need of extra help and support.	
<b>TECHNOLOGY AVAILABLE</b>	<p>Ironhand is the world's first active soft exoskeleton for the hand. The system consists of a glove, covering all five fingers, and a power pack worn in a backpack or hip-carry, using sensors located on the palm and the fingers.</p> <p>Carbonhand is a revolutionary aid that gives back power to people with impaired hand function. Pressure sensors and advanced technology ensure the glove adds power in cases where the user's muscles are inadequate. Pressure sensors in the fingers sense when the user needs support.</p>	
<b>WEB PAGE</b>	<a href="https://www.bioservo.com/">https://www.bioservo.com/</a>	
<b>COMPANY DESCRIPTION</b>	World-leading company within soft muscle strengthening systems that enhance natural grasp strength and improve quality of life. Solutions provide support to people in need of extra strength, endurance, or reduction of effort.	

Deliverable n<sup>o</sup> - name

[www.hacktex.eu](http://www.hacktex.eu)

Table 15: Company Nuada

		<b>MEDTECH</b>	
<b>COMPANY NAME</b>		<b>Nuada</b>	
			
<b>COUNTRY</b>	<b>Portugal</b>		
<b>PRODUCTS AVAILABLE</b>	Hand functions support gloves that provide confident grip when hand functions are impaired due to ageing processes, injuries and illness.		
<b>TECHNOLOGY AVAILABLE</b>	Innovative hand function support system which uses thin, breathable, flexible and smart textiles to provide a light, non-intrusive, safe and small glove, to be used on an everyday basis. For people with Musculoskeletal disorders, injuries, and work-related repetitive movements that result in health problems.		
<b>WEB PAGE</b>	<a href="https://nuada.pt/">https://nuada.pt/</a>		
<b>COMPANY DESCRIPTION</b>	NUADA is empowering the everyday tasks of the weaker hands. Talking about an orchestrated daily care that allows active people, who find themselves less resourceful, to regain autonomy and reconnect with the world around them.

## PRINTED ELECTRONICS

In this chapter companies, active in printed electronics are presented.

Each table is equipped with pictograms, depicting lines of work where companies are active, the country where the company is located, a description of available products and technologies as well as a website and a brief company description.

Table 11: Company Innovation Lab

 <b>PRINTED ELECTRONICS</b>	
<b>COMPANY NAME</b>	Innovation Lab GmbH
	
<b>COUNTRY</b>	Germany
	
<b>PRODUCTS AVAILABLE</b>	<p>Force-sensitive Matrices, BaMoS - The Innovative Battery Monitoring Solution for Automotive Applications. Power in any shape you can imagine.</p> <p>Services available: Adjustment of the layout and specifications of existing sensor technologies according to requirements, development of novel sensor technologies and sensor systems, design, development and production of hardware and software components. Embedding of sensors into hardware, software and cloud systems, data analysis using machine learning algorithms Prototyping.</p>
<b>TECHNOLOGY AVAILABLE</b>	Printed Organic Electronics, Printed Organic Sensors.
<b>WEB PAGE</b>	<a href="https://www.innovationlab.de/en/printed-electronics/about-us/innovationlab/">https://www.innovationlab.de/en/printed-electronics/about-us/innovationlab/</a>
<b>COMPANY DESCRIPTION</b>	Expert in printed and organic electronics with a focus on flexible printed pressure sensors.

Deliverable nº - name

[www.hacktex.eu](http://www.hacktex.eu)

Table 162: Company Elnatas

	<b>PRINTED ELECTRONICS</b>	
<b>COMPANY NAME</b>	Elnatas Europe	
 		
<b>COUNTRY</b>	Germany	
<b>PRODUCTS AVAILABLE</b>	Wire enamels, Impregnating materials, casting and potting materials, flexible electrical insulation materials, Materials for electronic protection, materials for tools and composites, speciality, and industrial coatings, and printed electronic products.	
<b>TECHNOLOGY AVAILABLE</b>	Coatings for applications in various market segments like non-stick coating, floor and anti-friction coatings. High-performing range of enamels for the use as magnet wire coatings, chemistries related to impregnation materials, supplies product solutions designed for use with application processes including room temperature hot polymerization, manual or through dosing systems, the printing of electronic parts makes it possible to eliminate electro-mechanical switches and knobs, etc., integrate into 3D surfaces, combine decoration and functionality, and embed LED and backlight.	
<b>WEB PAGE</b>	<a href="https://www.elantas.com/">https://www.elantas.com/</a>	
<b>COMPANY DESCRIPTION</b>	Leading manufacturer of insulating and protective materials with a focus on the global electrical and electronics industry. Portfolio of wire enamels, impregnating resins and varnishes, casting and potting resins, flexible electrical insulation materials, materials for electronic protection, speciality industrial coatings, products for printed electronics as well as a wide range of tooling and composite materials	

Deliverable n<sup>o</sup> - name

Table 17: Company Pel Limited

	<b>PRINTED ELECTRONICS</b>	
<b>COMPANY NAME</b>	Printed Electronics	
 		
<b>COUNTRY</b>	United Kingdom	
<b>PRODUCTS AVAILABLE</b>	Pel uv cure system for dimatix dmp, El. Controller, wearables – fabric circuits, Fabric LED screen, Printed sensors,	
<b>TECHNOLOGY AVAILABLE</b>	Experts in embedding electronics where electronics are not normally expected. medical, antennas, sensors, displays and printed batteries. Integrating elements with paper, plastic film, fabrics, ceramics, metals, and even large 3D physical objects. Supply training, product and process development for companies, universities and research organisations all around the world	
<b>WEB PAGE</b>	<a href="https://www.printedelectronics.com/">https://www.printedelectronics.com/</a>	
<b>COMPANY DESCRIPTION</b>	Experts in functional printing, material deposition, inkjet, and digital technologies.	

Deliverable n° - name

Page 22 of 28

Table 18: Company Sensing Tex

	<b>PRINTED ELECTRONICS</b>	
<b>COMPANY NAME</b>	Sensing Tex	
		
<b>COUNTRY</b>	Spain	
<b>PRODUCTS AVAILABLE</b>	Smart sensing mats, sensing wear ans luminous tex, as also supporting ideas,	
<b>TECHNOLOGY AVAILABLE</b>	Patented mapping sensors technology to make smart sensing mats. The technology can be applied by using completely standard weaving, printing, lamination and impregnation techniques which maintain the original properties of the material such as the flexibility, elasticity, comfort and the possibility to be washed.	
<b>WEB PAGE</b>	<a href="https://sensingtex.com/">https://sensingtex.com/</a>	
<b>COMPANY DESCRIPTION</b>	Based on patented technology of Stretchable Circuits, company whose services have a large international presence around the Globe.	

Deliverable nº - name

[www.hacktex.eu](http://www.hacktex.eu)

Page 23 of 28

Table 19: Company Quad Industries

	<b>PRINTED ELECTRONICS</b>	
<b>COMPANY NAME</b>	Quad Industries	
 		
<b>COUNTRY</b>	Belgium	
<b>PRODUCTS AVAILABLE</b>	Flexible printed electronics, Electric heating technologies, the Positive Temperature Coefficient flexible heaters, medical monitoring solutions such as medical skin patches, wearable skin patches,	
<b>TECHNOLOGY AVAILABLE</b>	Quad Industries is active in many areas, including the automotive sector, industry, home appliances and medical environments. They have expanded their activities in the fields of printed electronics even further, providing sectors with innovative, flexible sensor solutions.	
<b>WEB PAGE</b>	<a href="https://www.quad-ind.com/contact/">https://www.quad-ind.com/contact/</a>	
<b>COMPANY DESCRIPTION</b>	Quad Industries has been at the forefront of printed electronics for over 25 years. Making a reliable partner for the development and manufacturing of user interfaces, control panels and flexible sensors for various mark, focusing on R&D, Engineering, prototyping and manufacturing.

Page 24 of 28

## List of Europe-based industrial textile application element producers.

In this chapter, EU-based producers of textile elements and components for further use in smart textile manufacturing AND PROTOTYPING are presented.

### **POLISILK, SPAIN**

Produces Biobased and degradable yarns, long-lasting antibacterial polypropylene multifilaments, bicomponent yarns, Polypropylene multifilament yarns with higher temperature resistance etc.

**WEB:** <http://www.polisilk.com/>

### **E. CIMA, SPAIN**

Produces technical fabrics, 3D and spacer fabrics, polar textiles, meshes and nets.

**WEB:** <https://ecima.com/en/>

### **GERSTER TECHTEX, GERMANY**

Technical textiles such as woven and braided hoses and high-strength tapes, Composite materials such as knitted and weaved multiaxial ribbons, tapes, and Smart Textiles such as light emitting and heating fabrics.

**WEB:** <https://gerster-techtex.com/en/>

### **GENTHERM, GERMANY**

Active in three fields: In automotive, it produces automotive seat comfort and seat climate regulation systems, in the medicinal field it produces temperature regulation systems for patients and in the field of electronics it offers assembly and manufacturing solutions for electronic components and optimizations of battery life spans.

**WEB:** <https://gentherm.com/en/locations>

### **EMBRO, GERMANY**

Active in fields such as technical embroidery offering flexible heating elements and systems, Functional medical textiles, Textile sensors, Textile Conductive tapes, Fibre reinforced textiles.

**WEB:** <https://embro-tech.com/en/products-services/flexible-electronics/>

### **KUFNER, GERMANY**

Active in technical textiles for Automotive, Aviation, Furniture, Garments, Medical, and Flameretardent textiles.

**Web:** <https://kufner.com/>

## Technology providers for all specified application fields
